

# Floor Coverings

A floor is more than a concrete slab with an interior covering. It dictates the overall décor and personality of every room. Your floor should bring a room to life right under your feet.

From broadloom carpet and modular carpet tiles, to hard surfaces and specialty floor coverings, our full service flooring division can help you select the best application to meet your durability, longevity, and aesthetic goals.

We will help you think through the entire life cycle of the products, and make the best long-term, sustainable decision for your organization – from manufacturing to reclamation and recycling.

ELEMENTS considers the future in everything we do today.
