

Window Coverings

Glazings do not adequately protect the building occupants from heat gain and maximize the building envelope's energy savings. Although we offer window coverings of all types, shades offer excellent light and glare control with an uninterrupted view to the exterior. They protect furnishings and floor covering from harsh UV damage and save energy costs. They are simple to use, easy to clean and are durable in all types of commercial applications.

ELEMENTS considers the future in everything we do today.
