

- 77 attorneys, plus associates, paralegals, and support staff
- Multi-height Nucraft conference tables
- Integrated power and data ports for state of the art electronic connectivity.
- Knoll Secretarial stations using wood veneer systems, which proved to be more cost effective and functional than traditional mill work

With one of the premium locations in Denver they called home, R&L elected to remodel the top three floors of the Tabor Center rather than relocate. A dynamic, collaborative conferencing complex is the heart of the new R&L headquarters. They employed state of the art furniture in distinctive, vibrant veneers to energize the minds of all who have the privilege of coming here.
