

The Elements of Our Culture, Our Space and Our Environment

At ELEMENTS, respecting the environment is a big part of our corporate culture. Our investment in a new, beautiful, and sustainable space was in consideration of the environment as well as providing the best atmosphere for our guests to visit and our employees to work.

Beyond the symbolism, all ELEMENTS employees share an environmentally conscious vision. At ELEMENTS, we believe that we have a responsibility to take care of the world in which we live, that environmental respect is not a trend, and that it's not about following rules. It's about making responsible decisions daily as individuals, and collectively as an organization. Big or small, we try to exercise common sense and consider our affects on our environment.

Within our own space, here is how we are trying to make a difference:

- We recycle plastic, aluminum and paper throughout our facility.
- We request that whenever possible, furniture be shipped blanket wrapped, therefore eliminating the need for packing materials.
- We recycle as much packing materials as possible following our installations.
- We print all of our business cards, letterhead, promotional materials, etc. on recycled paper and use them discreetly.
- Promotional materials are produced and updated electronically, and printed on an as-needed basis.
- We encourage the use of our web site in lieu of marketing materials to save paper.
- ELEMENTS aligns with, and supports, manufacturers with a demonstrated commitment to sustainability.
- We encourage internal suggestions and input for better ways to be environmentally economical.
- We are always looking for new and better ways to conduct our business in environmentally responsible ways.

Our commitment is to keep trying; to keep doing more. Please visit us and experience the environment of our space.
